

Carbon-Negative Network Northeast

Confronting Climate Change

Backyard Biochar

The Dark Side of Soil Fertility

Carbon-Negative Energy, Food & Fertility

NOON-4pm, Sunday, October 19

Wrentham Development Center

Emerald Street, Wrentham, MA

Learn to be **Earth Aware** & CARBON-NEGATIVE

- ancient Amazon legacy to address our global ecological emergency
- simple, easy methods to make your own charcoal
- how to use charcoal to create super soil fertility
- gasification technology to create smokeless combustion
- independence from fossil fuel & imported oil
- grow food with superior nutritional quality, flavor and storage life

why is carbon black?

New Revolutionary CARBON-NEGATIVE

Strategy

to reverse climate change

& reduce fossil fuel dependence

- Produce Renewable Biofuels
- Sequester Carbon in Soil
- Reverse Global Warming
- Create Sustainable Soil Fertility
- Grow Nutrient Dense Food
- Support Local Food & Fuel Economies
