

Spring Grower Gathering How to Make & Use Biochar

Sponsored by Transition Town Great Barrington

1 – 3pm, Saturday, May 15

North Plain Farm

205 North Plain Road, Route 41, Great Barrington, MA

Biochar is the key to a new carbon-negative strategy to sequester carbon, create sustainable soil fertility, grow nutrient-dense crops, produce renewable biofuels, and reverse global climate change.

Farmers and gardeners are key leaders in this effort, since the key action is to add charcoal to soil.

This gathering will teach growers simple methods to acquire biochar and incorporate it in soil.

Rocket Stove plus
Backyard Barrel Burner
